AMA VOTES TO CONTINUE COMMITMENT TO HEALTH SYSTEM REFORM

Outlines details to guide efforts toward making the health system better for patients and physicians

HOUSTON – The American Medical Association (AMA) House of Delegates today voted on health system reform policies, reaffirming the AMA’s commitment to health system reform. The AMA's House of Delegates is the nation's broadest, most inclusive assembly of physicians and medical students. Delegates representing every state and medical specialty debate and vote on behalf of their physician peers.

“Now is a defining moment in the history of the AMA,” said AMA President J. James Rohack, M.D. “In a democratic process, the AMA House of Delegates today voted to continue AMA’s commitment to health system reform for patients and physicians. The time to make health system reform a reality is now.”

The AMA reaffirmed its support for health system reform alternatives that are consistent with AMA policies concerning pluralism, freedom of choice, freedom of physician practice and universal access for patients. It also outlined specific elements it will actively and publicly support and oppose as the health system debate continues.

The AMA’s support for H.R. 3962 and H.R. 3961 remains in place. “H.R. 3962 is not the perfect bill, and we will continue to advocate for changes that help make the system better for patients and physicians as the legislative process continues,” Dr. Rohack said.

AMA reiterated that health system reform must include Medicare physician payment reform to preserve access to care for seniors, baby boomers and military families. “Ensuring the security and stability of Medicare must serve as the foundation for any serious health system reform this year," Dr. Rohack said. “In less than 60 days, Medicare physician payments are scheduled to be cut by 21 percent, with more cuts in years to come. According to a recent AARP poll, nearly 90 percent of people age 50 and older are concerned that the current Medicare physician payment formula threatens their access to care. We must pass H.R. 3961 as an essential element of health reform and to fulfill Congress’ obligations to current and future Medicare patients.”
Health system reform policy from today’s action is below:

SUBSTITUTE RESOLUTION 203: HEALTH SYSTEM REFORM LEGISLATION

RESOLVED, That our American Medical Association is committed to working with Congress, the Administration, and other stakeholders to achieve enactment of health system reforms that include the following seven critical components of AMA policy:

· Health insurance coverage for all Americans;
· Insurance market reforms that expand choice of affordable coverage and eliminate denials for pre-existing conditions or due to arbitrary caps;
· Assurance that health care decisions will remain in the hands of patients and their physicians, not insurance companies or government officials;
· Investments and incentives for quality improvement and prevention and wellness initiatives;
· Repeal of the Medicare physician payment formula that triggers steep cuts and threaten seniors’ access to care;
· Implementation of medical liability reforms to reduce the cost of defensive medicine; and
· Streamline and standardize insurance claims processing requirements to eliminate unnecessary costs and administrative burdens; and be it further

RESOLVED, That our American Medical Association advocate that elimination of denials due to pre-existing conditions is understood to include rescission of insurance coverage for reasons not related to fraudulent representation; and be it further

RESOLVED, That our American Medical Association House of Delegates supports AMA leadership in their unwavering and bold efforts to promote AMA policies for health system reform in the United States; and be it further

RESOLVED, That our American Medical Association support health system reform alternatives that are consistent with AMA policies concerning pluralism, freedom of choice, freedom of practice, and universal access for patients; and be it further

RESOLVED, That it is American Medical Association policy that insurance coverage options offered in a health insurance exchange be self-supporting, have uniform solvency requirements; not receive special advantages from government subsidies; include payment rates established through meaningful negotiations and contracts; not require provider participation; and not restrict enrollees’ access to out-of-network physicians; and be it further

RESOLVED, That our AMA actively and publicly support the inclusion in health system reform legislation the right of patients and physicians to privately contract, without penalty to patient or physician; and be it further

RESOLVED, That our AMA actively and publicly oppose the Independent Medicare Commission (or other similar construct), which would take Medicare payment policy out
of the hands of Congress and place it under the control of a group of unelected individuals; and be it further

RESOLVED, That our AMA actively and publicly oppose, in accordance with AMA policy, inclusion of the following provisions in health system reform legislation:

- Reduced payments to physicians for failing to report quality data when there is evidence that widespread operational problems still have not been corrected by the Centers for Medicare and Medicaid Services;
- Medicare payment rate cuts mandated by a commission that would create a double-jeopardy situation for physicians who are already subject to an expenditure target and potential payment reductions under the Medicare physician payment system;
- Medicare payments cuts for higher utilization with no operational mechanism to assure that the Centers for Medicare and Medicaid Services can report accurate information that is properly attributed and risk-adjusted;
- Redistributed Medicare payments among providers based on outcomes, quality, and risk-adjustment measurements that are not scientifically valid, verifiable and accurate;
- Medicare payment cuts for all physician services to partially offset bonuses from one specialty to another; and
- Arbitrary restrictions on physicians who refer Medicare patients to high quality facilities in which they have an ownership interest; and be it further

RESOLVED, That our American Medical Association continue to actively engage grassroots physicians and physicians in training in collaboration with the state medical and national specialty societies to contact their Members of Congress, and that the grassroots message communicate our AMA’s position based on AMA policy; and be it further

RESOLVED, That our American Medical Association use the most effective media event or campaign to outline what physicians and patients need from health system reform; and be it further

RESOLVED, That national health system reform must include replacing the sustainable growth rate (SGR) with a Medicare physician payment system that automatically keeps pace with the cost of running a practice and is backed by a fair, stable funding formula, and that the AMA initiate a “call to action” with the Federation to advance this goal; and be it further

RESOLVED, That creation of a new single payer, government-run health care system is not in the best interest of the country and must not be part of national health system reform; and be it further

RESOLVED, That effective medical liability reform that will significantly lower health care costs by reducing defensive medicine and eliminating unnecessary litigation from the system should be part of any national health system reform; and be it further

RESOLVED, That our American Medical Association reaffirm AMA policy H-460.909 Comparative Effectiveness Research.
