

**No matter where  
you work,**

**Lung cancer  
should not come  
with the job.**

With every breath in a bar or restaurant that allows smoking, workers are exposed to over 7,000 chemicals that cause lung cancer, heart disease and other serious illnesses. That's why Indiana needs a smokefree law that protects ALL workers.

**Protect everyone's right to breathe clean air.  
Support smokefree workplaces for all.**
