

Tashera Perry, MD for AMA Delegate

PROTECT | STEWARD | STRENGTHEN

Thank you for taking a moment to learn more about my candidacy for AMA Delegate. I'm an OB/GYN in south-central Indiana, where rural hospital cutbacks and maternity-unit closures are limiting access for entire communities. I also see continued threats to women's privacy and autonomy in early pregnancy. My priorities at the AMA are to **protect** rural and reproductive access to care, **steward** AI innovation in health care, and **strengthen** Indiana's relationships within the House of Medicine.

Protect rural and reproductive access to care.

I bring frontline experience with rural hospital cutbacks, maternity-unit closures, and limited access. I will also advocate for the confidentiality of reproductive health records and for medically accurate definitions of miscarriage and pregnancy loss.

Steward AI innovation in health care.

I bring years of work in clinical informatics and ethics, including service on an AMA Reference Committee on Ethics and Bylaws. Our delegation moved Indiana's resolution across the finish line to become AMA policy. It calls for federal regulation of artificial intelligence (AI) scribe technologies that protects clinician and patient privacy.

Strengthen Indiana's relationships across the AMA.

At the AMA, relationships move good ideas forward. I am actively engaged with the Underrepresented in Medicine Advocacy Section, Women Physicians Section, Informatics Caucus, OB/GYN Caucus, and Health Equity Caucus. I will continue strengthening those relationships and building coalitions so Indiana's priorities are heard across the House.

I know the issues. I understand the process. I am building the relationships. I would be grateful for your support and your vote.
