### Planning Process
The CME planning process is based on a foundation of needs assessment which serves to identify professional practice gaps of the intended audience, articulate the needs, and outline the objectives and expectations necessary to design learning activities that will change competence, performance, and/or patient outcomes. This process can be visually depicted as follows:

```
Question in Practice → Current Practice → Best Practice → Gaps → Type of Gap → Needs → Objectives → Expected Results
```

### Step 7 – State the professional practice gap(s) of your learners on which the activity is based and how this problem was discovered or identified. Describe the professional, practice or system-based problem(s) for your learners that will be addressed through this educational intervention.

*Click here to enter text.*

### Step 8 – State the educational need(s) that you’ve determined to be the cause of the professional practice gap. What will help solve the problem?

**Knowledge need** (i.e., is there new technology or new information that physicians need to know more about)

*Click here to enter text.*

**Competence need** (i.e., are there tools or strategies available that might help learners apply what they should already know)

*Click here to enter text.*

**Performance need** (i.e., is there new technology or clinical information that necessitate learners assimilating new skills)

*Click here to enter text.*

### Step 9 – State what the CME activity is designed to change in terms of learners’ competence, performance or patient outcomes. What are the objectives? Objectives are the take-home messages following the activity and describe what the learner should be able to do after completing the CME activity. They must be specific, measurable and bridge gaps between identified problem and desired outcomes. (Insert rows as needed)

**Learning Objectives – Finish the statement:**

At the completion of this activity participants should be able to:

| How will you know if your learner’s competence, or performance, or patient outcomes were impacted by these objectives? |
|---|---|
| ☐ Subjective data - participants will self-report changes |
| ☐ Objective data - chart pulls, QI data |
| ☐ Subjective data - participants will self-report changes |
| ☐ Objective data - chart pulls, QI data |
