Accreditation Council for Continuing Medical Education (ACCME®) and American Medical Association (AMA)
Glossary of Terms and Definitions

ACCME Recognized Accreditors
State and territory medical societies recognized by the ACCME as accreditors of intrastate CME providers. To achieve recognition, a state or territory medical society must meet the ACCME requirements, the Markers of Equivalency.

Accreditor
An organization that sets and enforces the standards for CME provider organizations and/or activities through review and approval of organizations/activities, and monitors and enforces guidelines for these organizations/activities.

Accreditation
The framework by which a program of CME is assessed to determine whether the program meets the accreditor’s requirements. See also “Accredited CME provider.”

Accreditation criteria
The requirements against which CME providers’ compliance is determined in order to achieve or maintain accreditation.

Accreditation decision
The decisions made by an accreditor concerning the accreditation status of CME providers. In the ACCME System, there are five options for accreditation status: Provisional Accreditation, Accreditation, Accreditation with Commendation, Probation, and Nonaccreditation.

Accreditation interview
A step in the accreditation and reaccreditation process. In the ACCME System, volunteer surveyors review the CME provider’s self-study report and performance-in-practice files, and then meets with the provider for the interview portion of the reaccreditation process. The purpose of the interview is for the provider to explain how the CME program fulfills accreditation requirements, and to discuss its strengths, accomplishments, and challenges.

Accreditation Review Committee (ARC)
The ACCME volunteer committee that reviews and analyzes the materials submitted by CME providers and surveyors to determine providers’ compliance with the ACCME Accreditation Criteria and policies. Based on this review, the ARC makes recommendations about accreditation decisions to the ACCME Decision Committee.

Accreditation statement
The standard statement that must appear on all CME activity materials and brochures distributed by ACCME-accredited providers. There are two variations of the statement; one for directly provided activities and one for jointly provided activities.
The first session is about Setting the “CME Stage.”

We will discuss:

1. What continuing education (CE) is;
2. Why & When physicians need CE.
Where and When is CE?

A Lifetime of Physician Professional Development

- Medical Student → Resident → Licensed → Specialist → Credentialed → Practicing

- Achieving Licensure → Maintenance of Licensure
- Achieving Certification → Maintenance of Certification

- Undergraduate Medical Education (LCME) → Graduate Medical Education (ACGME)

Continuing Medical Education
- Provider Accreditation by ACCME;
- Activity Accreditation by AAFP;
- Credit Systems by membership organizations (e.g. AMA, AAFP)
What is CE?

Key Terms:

Accredited continuing education (CE) promotes a lifelong learning mindset of continuous professional development to gain new knowledge and skills.

Continuing professional development (CPD): includes all activities that any health professional undertakes, formally and informally, including CE.
What is CE?
What is CE?

Definition of CME:

CME consists of educational activities which serve to maintain, update, develop, and enhance their knowledge, skills, and attitudes in response to the needs of their patients, the public or the profession.

The content of CME is the body of knowledge and skills generally recognized and accepted by the profession as within the basic medical sciences, the discipline of clinical medicine and the provision of health care to the public.
Certified CME is defined as:

Nonpromotional learning activities certified for credit prior to the activity by an organization authorized by the credit system owner, or for which the credit system owner (AMA) directly awards credit.

Accredited CME providers may certify nonclinical subjects (e.g., office management, patient-physician communications, faculty development) for AMA PRA Category 1 Credit™ as long as these are appropriate to a physician audience and benefit the profession, patient care or public health.
## CME Presented by Providers Accredited in the ACCME System

| Number of providers               | Grand total 2019³ | 1,724 | 188,992 | 1,309,167 | 17,318,795 | 19,696,421 |

---

¹ Physician and other learner interactions are estimated numbers based on professional judgment.
³ Grand total does not include subspecialty CME providers who reported only some of the CME activities listed above.
Non-live Activities or “Enduring”
• On-Demand Internet Journal Activities
• Recorded Video & Audio
• Case Studies & Narrative

Live Activities:
• In Person Course
• Small Group Discussions
• Simulation & Training
• Committee Work
• Webcast & Video Conferencing
What do you want to change?
What is CE?

**Act**
Decide what's next. Make changes and start another cycle.

**Plan**
Describe objective, change being tested, predictions. Needed action steps. Plan for collecting data.

**Study**
Analyze data. Compare outcomes to predictions. Summarize what you learned.

**Do**
Run the test. Describe what happens. Collect data.
The process begins with addressing a question in practice for your learners,

“What’s the practice-based problem we want to address?”
Professional Practice Gap

- Surveys
- Case-based Questions or assessment.
- New Published Standards
- Research Insights from a National Perspective about Practice Gaps and ask, “Do my learners share these gaps?”
Who is involved in the planning?

1. The Accredited Provider

2. Accredited Provider
   + Nonaccredited Organization
   = Joint Providership
   ✓ the accredited provider is responsible for compliance!

3. More than one Accredited Provider
   ✓ one provider must take responsibility for compliance
Why do physicians need CME?
Where and When is CE?

A Lifetime of Physician Professional Development
Next Up....

Introduction to the History and Role of Accredited CE
What does it all mean?

What Does It Mean to Be Accredited in the ACCME System?

Most state legislatures implemented mandatory requirements for physicians to participate in CME for re-licensure.

States that do not: Colorado, Montana, New York, South Dakota, Vermont.
In 1973, Senator Edward Kennedy led hearings to explore the economics of the pharmaceutical industry’s development, promotion, and pricing of new medicines.

These hearings and continued efforts in the 1970s and 1980s helped to define expectations and boundaries between medicine and industry.
Why does it matter?

In the 1990s, Senator Kennedy’s advocacy for standard approaches to ensure the independence of CME from commercial interests was the impetus for ACCME’s Standards for Commercial Support.
In 1981, the **Accreditation Council for Continuing Medical Education (ACCME)** was created by seven member organizations:

- The American Board of Medical Specialties (ABMS)
- American Hospital Association (AHA)
- American Medical Association (AMA)
- Association for Hospital Medical Education (AHME)
- Association of American Medical Colleges (AAMC)
- Council of Medical Specialty Societies (CMSS)
- Federation of State Medical Boards of the U.S. (FSMB)
What is the goal?

The **ACCME** succeeded the Liaison Committee for Continuing Medical Education and the American Medical Association’s Committee on Accreditation of Continuing Medical Education.

They were charged with creating a **unified national accreditation system**. The ACCME’s purpose was to institute a **voluntary, self-regulatory process** for the accreditation of institutions that provide continuing medical education and to **develop rigorous standards** to ensure the quality and independence of CME across the country.
What was the outcome?

The ACCME accredits organizations that provide continuing medical education to physicians and oversees accreditation requirements which help organizations deliver effective education that accelerates learning, change, and improvements in healthcare.
The purpose of accreditation is to provide a framework for quality continuing medical education.

Accredited organizations are responsible for demonstrating that they meet requirements for delivering independent CME which accelerates learning, change, and improvement in healthcare professionals and in turn improves overall healthcare quality, value, and patient outcomes.
Since 1849, ISMA has educated physicians about scientific and clinical developments in medicine.
Regulatory Organizations

The Federation of State Medical Boards (FSMB)

Most state medical boards require physicians to participate in accredited CME to maintain their license to practice. The Federation of State Medical Boards (FSMB) represents and supports these local organizations throughout the US and its territories.
Regulatory Organizations

American Board of Medical Specialties (ABMS)

American Board of Allergy and Immunology
American Board of Anesthesiology
American Board of Colon and Rectal Surgery
American Board of Dermatology
American Board of Emergency Medicine
American Board of Family Medicine
American Board of Internal Medicine
American Board of Medical Genetics and Genomics
American Board of Neurological Surgery
American Board of Nuclear Medicine

American Board of Obstetrics and Gynecology
American Board of Ophthalmology
American Board of Orthopaedic Surgery
American Board of Otolaryngology – Head and Neck Surgery
American Board of Pathology

Mission
Mission:
The provider has a CME mission statement that includes expected results articulated in terms of changes in competence, performance, or patient outcomes that will be the result of the program. (formerly Criterion 1)
ACCME Note
The ACCME asks the accredited provider to craft a CME mission statement that will serve as a roadmap for what it seeks to achieve through its accredited CME program. The provider is free to include any parameters that are relevant to its program, learners, setting, goals, but must at least include what it seeks to change in terms of learners’ competence, performance and/or patient outcomes.
Mission Statement - PRACTICE:

AAFP Mission Statement: The American Academy of Family Physicians (AAFP) seeks to provide family physicians and other health care professionals with continuing medical education activities that are based on the principles of adult learning. These activities are high-quality, unbiased, evidence-based, up-to-date, learner-driven, and produced in a variety of formats. The expected outcome of the AAFP CME program is to increase the ratio of learners who plan and/or demonstrate implementation of a meaningful change in their practices.
AAP: The mission of the American Academy of Pediatrics is to attain optimal physical, mental, and social health and well being for all infants, children, adolescents, and young adults. To accomplish this, the AAP will make education and CPD of its members a priority by being the premier source of pediatric education and learning.

The AAP expects that its learning activities will maintain and improve the competence and professional performance of pediatricians and pediatric health care professionals.
CME Mission and Program Improvement

Program Analysis
Program Analysis:
The provider gathers data or information and conducts a program-based analysis on the degree to which the CME mission of the provider has been met through the conduct of CME activities/educational interventions. (formerly Criterion 12)
CME Mission and Program Improvement

ACCME Note
Using data, information, and analysis from Analyzes Change, the provider is asked to step back and review its CME mission statement. Has it been successful in achieving what it outlined as expected results related to learner or patient outcome change? If not, why not?
CME Mission and Program Improvement

Program Analysis:

Plan
Describe objective, change being tested, predictions. Needed action steps. Plan for collecting data.

Do
Run the test. Describe what happens. Collect data.

Study
Analyze data. Compare outcomes to predictions. Summarize what you learned.

Act
Decide what’s next. Make changes and start another cycle.
Program Improvements:
The provider identifies, plans and implements the needed or desired changes in the overall program (eg, planners, teachers, infrastructure, methods, resources, facilities, interventions) that are required to improve on ability to meet the CME mission.
(formerly Criterion 13)
ACCME Note: Building from the review of its CME mission, the provider is asked to identify, plan, and implement changes to its CME program that will help it be more effective. This step-wise process of collecting data, reviewing it, comparing it to expected changes, and then making adjustments to be more effective, is a form of quality improvement for the accredited provider.
Educational Planning and Evaluation

Educational Needs
Educational Needs

The provider incorporates into CME activities the educational needs (knowledge, competence, or performance) that underlie the professional practice gaps of their own learners. (formerly Criterion 2)
ACCME Note

The accredited provider addresses, through its CME activities, problems in practice and/or patient care. As part of that effort, the provider examines those problems and looks for knowledge, strategy, skill, performance, or system deficits that could be contributing to the problems. By doing so, the provider is able to plan and implement education that will effectively address the problems.
CME Mission and Program Improvement

Examples:

• Evaluation Feedback
• Performance Measures
• Updated Guidelines
• New Technology
• New Drugs
• Patient Outcomes
• What Else?
Educational Planning and Evaluation

Designed to Change
Designed to Change

The provider generates activities/educational interventions that are designed to change competence, performance, or patient outcomes as described in its mission statement. (formerly Criterion 3)
ACCME Note

In fulfillment of its mission, and as a next step in the planning process, the accredited provider designs its education to change learners’ strategies/skills (i.e., competence), and/or what learners actually do in practice (i.e., performance), and/or the impact on the patient or on the care delivered (i.e., patient outcomes).
Knowledge

• The theoretical or practical understanding of a subject.
• What an individual does or does not know.
Competence

- Competence is about ability (skill).
- Competence is what you would do if you could do it.
- It’s descriptive of strategy.
- Competence is knowledge put into action; put into action by the learner.
• When you put competence into practice — that’s performance.

• Performance implies *in practice*. 
Patient Outcomes

• Outcome:
  – patient outcome
  – research outcome
  – executive outcome
  – administrative outcome

Those are the consequences in the system, in your stakeholder, in the place of application of your performance.
Educational Planning and Evaluation

**Appropriate Formats**

- **Enduring Materials**
- **Live CME Activities**
- **Online CME Courses**
- **Journals**
- **Test Item Writing**
- **Internet Searching & Learning**
- **Scheduled Series**
Appropriate Formats

The provider chooses educational formats for activities/interventions that are appropriate for the setting, objectives, and desired results of the activity. (formerly Criterion 5)
ACCME NOTE

Activity formats (e.g., didactic, small group, interactive, hands-on skill labs) should be chosen based on what the provider hopes to change as a result of the education. Adult education literature provides guidance about which learning formats are more effective than others depending on the outcome that is desired, the setting, and the needs of the learners.
Educational Planning and Evaluation

Competencies
Competencies:

The provider develops activities/educational interventions in the context of desirable physician attributes (competencies). (formerly Criterion 6)
The ACCME is looking for an active recognition of "desirable physician attributes" in the planning process (e.g., "We have planned to do a set of activities that touch on professionalism and communications to address our patients' concerns that they are not receiving complete discharge instructions - which is the identified professional practice gap.") The simple labeling of an activity with a competency is a start and provides the learner with information with which to choose an activity and potentially will be important for reporting purposes within Maintenance of Certification/Continuing Certification.
## Educational Planning and Evaluation

### IOM
- Provide patient centered care
- Work in interdisciplinary teams
- Employ evidence-based practice
- Apply quality improvement
- Utilize informatics

### ABMS/ACGME
- Patient Care
- Medical Knowledge
- Interpersonal and Communication Skills
- System based Practice
- Practice Based Learning and Improvement

### IPEC
- Value/Ethics for Interprofessional Practice
- Roles/Responsibilities
- Interprofessional Communication
- Teams and Teamwork
Competencies:

What are some ideas for how to demonstrate this?
Educational Planning and Evaluation

Analyze Change
Analyze Change:

The provider analyzes changes in learners (competence, performance, or patient outcomes) achieved as a result of the overall program's activities/educational interventions. (formerly Criterion 11)
ACCME Note:

The accredited provider is asked to collect data and information about the changes that result from its educational interventions, including changes it expects learners to make, changes that learners actually make, and/or the impact on patients. Using this data and information, the provider is asked to look across all its activities and analyze its impact in terms of those changes.
Educational Planning and Evaluation

Analyze Change:

What kind of data are we talking about?

- Audience response
- Evaluation feedback
- Hospital data
- Follow-up surveys
- Interviews
Analyze Change:

Accredited CME providers should periodically review all the data they have gathered from all the activities held in a time period.

*It is an organizational choice how often* they reflect upon their CME programs impact, but it *must be done at least once per accreditation cycle.*
Analyze Change:

What kind of data?

• Audience response
• Evaluation feedback
• Hospital data
• Follow-up surveys
• Interviews

The data that is gathered at each activity then becomes the foundation blocks on which Analyzes Change, Program Analysis and Program Improvements are determined.
Who is responsible for doing this work?
Description
The Continuing Medical Education Committee (CME) is advisory in nature and serves to help ensure that the organization’s continuing medical education program meets or exceeds the Standards, Criteria and Policies of the [Accreditation Council for Continuing Medical Education (ACCME)](https://www. accme.org) and the [American Medical Association’s](https://www.ama-assn.org) rules for their [Physician’s Recognition Award (AMA PRA)](https://www.ama-assn.org). Alternatively called a CME Advisory Committee, it’s purpose is to provide input and guidance on the strategic direction of the CME program.
Activities

• Review and recommend policies for the CME Program. Serve as an advisory resource to staff for any CME program-related grievances. Review and recommend the CME Mission Statement and its subsequent revisions on an annual basis.

• Review and approve sessions and proposals against CME eligibility criteria.

• Review the annual report and self-analysis of the CME Program and its effectiveness in meeting the CME Mission. Discuss this report and recommend improvements to the process, if needed.
Activities

- Retrospectively review/evaluate CME activity outcome measurements/results to determine the impact of CME programming
- Peer review of content of CME activities, if requested and falls within expertise.
- Provide general guidance and advice on clinical areas of interest and recommend expansion of program regarding topics and types of educational methodology utilized to deliver education to prospective participants.
Standards for Integrity and Independence in Accredited Continuing Education
Standards for Integrity and Independence in Accredited Continuing Education

American Academy of Family Physicians (AAFP)

American Nurses Credentialing Center (ANCC)

Association of Regulatory Boards of Optometry’s Council on Optometric Practitioner Education (ARBO/COPE)

Joint Accreditation for Interprofessional Continuing Education™
Standards for Integrity and Independence in Accredited Continuing Education

STANDARD 1: ENSURING CONTENT IS VALID
Standard 1 applies to all accredited continuing education.

Ensure that education is fair and balanced... clinical content supports safe, effective patient care.

1. All recommendations based on current science, evidence, and clinical reasoning, while giving a fair and balanced view of diagnostic and therapeutic options.

2. All scientific research referred to, reported, or used...must conform to the generally accepted standards of experimental design, data collection, analysis, and interpretation.

3. Discuss, debate, and explore new and evolving topics... facilitate engagement with these topics without advocating for, or promoting, practices that are not/not yet adequately based on current science, evidence, and clinical reasoning.

4. Cannot advocate for unscientific approaches to diagnosis or therapy, or promote recommendations, treatment, or manners of practicing healthcare that are determined to have risks or dangers that outweigh the benefits or are known to be ineffective...
STANDARD 1: ENSURING CONTENT IS VALID

Questions

1. What do we do if we need to teach about content that is unknown or unproven, e.g., COVID19? How do we ensure balance?
STANDARD 2: PREVENT COMMERCIAL BIAS AND MARKETING IN ACCREDITED CONTINUING EDUCATION

Standard 2 applies to all accredited continuing education.

Accredited continuing education must protect learners from commercial bias and marketing.

1. ...must ensure that all decisions ... are made without any influence or involvement from the owners and employees of an ineligible company.

2. ...must be free of marketing or sales of products or services. Faculty must not actively promote or sell products or services that serve their professional or financial interests during accredited education.

3. ...must not share the names or contact information of learners with any ineligible company or its agents without the explicit consent of the individual learner.
STANDARD 2: PREVENT COMMERCIAL BIAS AND MARKETING IN ACCREDITED CONTINUING EDUCATION

Questions

1. Can a faculty member reference a book that she wrote or would that be considered “sales?”
2. Can we raffle off a book written by a faculty member?
3. Do we need to ask learners if they perceived any sales, marketing or commercial bias during the education?
4. What is meant by “explicit consent” of learners in terms of getting permission to share their information with ineligible companies?
STANDARD 3: IDENTIFY, MITIGATE, AND DISCLOSE RELEVANT FINANCIAL RELATIONSHIPS

Standard 3 applies to all accredited continuing education.

Accredited providers must take the following steps when developing accredited continuing education.

1. **Collect information**: Collect information from all ... about **all their financial relationships** with ineligible companies within the **prior 24 months**. There is no minimum financial threshold; individuals must disclose all financial relationships, regardless of the amount, with ineligible companies. Individuals must disclose regardless of their view of the relevance of the relationship to the education.

Disclosure information must include:

   a. The name of the ineligible company with which the person has a financial relationship.
   
   b. The nature of the financial relationship...
STANDARD 3: IDENTIFY, MITIGATE, AND DISCLOSE RELEVANT FINANCIAL RELATIONSHIPS (CONT.)

2. **Exclude owners or employees of ineligible companies**: Review the information about financial relationships to identify individuals who are owners or employees of ineligible companies. These individuals must be excluded from controlling content or participating as planners or faculty in accredited education. There are three exceptions to this exclusion:

   a. When the content of the activity is not related to the business lines or products of their employer/company.

   b. When the content of the accredited activity is limited to basic science research, such as pre-clinical research and drug discovery, or the methodologies of research, and they do not make care recommendations.

   c. When they are participating as technicians to teach the safe and proper use of medical devices, and do not recommend whether or when a device is used.
STANDARD 3: IDENTIFY, MITIGATE, AND DISCLOSE RELEVANT FINANCIAL RELATIONSHIPS (CONT.)

3. Identify relevant financial relationships: Review the information about financial relationships to determine which relationships are relevant. Financial relationships are relevant if the educational content an individual can control is related to the business lines or products of the ineligible company.

4. Mitigate relevant financial relationships: Take steps to prevent all those with relevant financial relationships from inserting commercial bias into content.

a. Mitigate relationships prior to the individuals assuming their roles. Take steps appropriate to the role of the individual. For example, steps for planners will likely be different than for faculty and would occur before planning begins.

b. Document the steps taken to mitigate relevant financial relationships.
STANDARD 3: IDENTIFY, MITIGATE, AND DISCLOSE RELEVANT FINANCIAL RELATIONSHIPS (CONT.)

5. **Disclose all relevant financial relationships to learners:** Disclosure to learners must include each of the following:
   a. The names of the individuals with relevant financial relationships.
   b. The names of the ineligible companies with which they have relationships.
   c. The nature of the relationships.
   d. **A statement that all relevant financial relationships have been mitigated.**

Learners must receive disclosure information, in a format that can be verified at the time of accreditation, before engaging with the accredited education.
5. **Disclose all relevant financial relationships to learners:** Disclosure to learners must include each of the following:

   a. The names of the individuals with relevant financial relationships.
   b. The names of the ineligible companies with which they have relationships.
   c. The nature of the relationships.
   d. **A statement that all relevant financial relationships have been mitigated.**

Learners must receive disclosure information, in a format that can be verified at the time of accreditation, before engaging with the accredited education.
STANDARD 3: IDENTIFY, MITIGATE, AND DISCLOSE RELEVANT FINANCIAL RELATIONSHIPS (CONT.)

Exceptions: Accredited providers do not need to identify, mitigate, or disclose relevant financial relationships for any of the following activities:

1. Accredited education that is non-clinical...

2. Accredited education where the learner group is in control of content...

3. Accredited self-directed education where the learner controls their educational goals and reports on changes that resulted, such as learning from teaching, remediation, or a personal development plan...
Standards for Integrity and Independence in Accredited Continuing Education

STANDARD 3: IDENTIFY, MITIGATE, AND DISCLOSE RELEVANT FINANCIAL RELATIONSHIPS

Questions

1. Can we use our planners or other content experts to help determine relevance of relationships?
2. Can we ask planners/faculty to attest to “using best available evidence” as the mitigation strategy at the time the planners/faculty give us all their financial relationships?
3. Are regularly scheduled series (case conferences, grand rounds, tumor boards) considered an exception to Standard 3?
4. Are “ethics” and “resiliency” examples of accredited education that is non-clinical, and therefore exceptions?
STANDARD 4: MANAGE COMMERCIAL SUPPORT APPROPRIATELY

Standard 4 applies only to accredited continuing education that receives financial or in-kind support from ineligible companies.

Accredited providers that choose to accept commercial support are responsible for ensuring that the education remains independent of the ineligible company and that the support does not result in commercial bias or commercial influence in the education.

1. Decision-making and disbursement...
2. Agreement...
3. Accountability...
4. Disclosure to learners...

(Note: the proposed change that would have prohibited joint providers from reimbursing faculty expenses using commercial support was removed from the final standard.)
STANDARD 4: MANAGE COMMERCIAL SUPPORT APPROPRIATELY

Questions

1. Are there any changes in the requirement of how commercial support can be accepted and managed by the accredited provider?
2. Do we still need to have and demonstrate compliance with a policy on honoraria and expense reimbursement for our volunteers?
3. Do we have to have a policy that outlines how we manage commercial support?
4. Can we charge different groups of learners different registration fees, e.g., students, members?
STANDARD 5: MANAGE ANCILLARY ACTIVITIES OFFERED IN CONJUNCTION WITH ACCREDITED CONTINUING EDUCATION

Standard 5 applies only when there is marketing by ineligible companies or nonaccredited education associated with the accredited continuing education.

Accredited providers are responsible for ensuring that education is separate from

- marketing by ineligible companies—including advertising, sales, exhibits, and promotion—and from
- nonaccredited education offered in conjunction with accredited continuing education.

Arrangements to allow ineligible companies to market or exhibit in association with accredited education...

The accredited provider must ensure that learners can easily distinguish between accredited education and other activities...

- Live continuing education activities...must not occur in the educational space within 30 minutes before or after an accredited education activity
- Print, online, or digital continuing education activities...
- Educational materials that are part of accredited education (such as slides, abstracts, handouts, evaluation mechanisms, or disclosure information) must not contain any marketing produced by or for an ineligible company...
- Information distributed about accredited education that does not include educational content, such as schedules and logistical information, may include marketing by or for an ineligible company.

Ineligible companies may not provide access to, or distribute, accredited education to learners.
Standards for Integrity and Independence in Accredited Continuing Education

STANDARD 5: MANAGE ANCILLARY ACTIVITIES OFFERED IN CONJUNCTION WITH ACCREDITED CONTINUING EDUCATION

Questions

1. What is the definition of “educational space”?

2. Is the “30 minute” separation requirement between marketing/non-accredited education and accredited education applicable only to live, in-person activities? What about live streamed, online activities?

3. Can marketing or non-accredited education take place at the same time as accredited education as long as it is in a different room and is clearly communicated to learners?
ACCME Policies
Providers accredited within the ACCME System (providers directly accredited by the ACCME and those accredited by ACCME Recognized Accreditors) are welcome to use the ACCME Accredited mark for educational and identification purposes, and in announcements related to their attainment of ACCME accreditation. While the mark may be resized, the original aspect ratio should be maintained (it should not be stretched or condensed in a way that causes it to become distorted). Except for resizing, no other changes can be made.
The accreditation statement must appear on CME activity materials and brochures distributed by accredited organizations, except that the accreditation statement does not need to be included on initial, save-the-date type activity announcements. Such announcements contain only general, preliminary information about the activity such as the date, location, and title. If more specific information is included, such as faculty and objectives, the accreditation statement must be included.
The ACCME accreditation statement is as follows:

For directly provided activities: “The (name of accredited provider) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.”

For jointly provided activities: “This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education (ACCME) through the joint providership of (name of accredited provider) and (name of nonaccredited provider). The (name of accredited provider) is accredited by the ACCME to provide continuing medical education for physicians.”
There is no "co-providership" accreditation statement. If two or more accredited providers are working in collaboration on a CME activity, one provider must take responsibility for the compliance of that activity. Co-provided CME activities should use the directly provided activity statement, naming the one accredited provider that is responsible for the activity. The ACCME has no policy regarding specific ways in which providers may acknowledge the involvement of other ACCME-accredited providers in their CME activities.
Attendance Records: An accredited provider must have mechanisms in place to record and, when authorized by the participating physician, verify participation for six years from the date of the CME activity. The accredited provider is free to choose whatever registration method works best for their organization and learners. The ACCME does not require sign-in sheets.

Activity Documentation: An accredited provider is required to retain activity files/records of CME activity planning and presentation during the current accreditation term or for the last twelve months, whichever is longer.
All CME educational activities developed and presented by a provider accredited by the ACCME system and associated with AMA PRA Category 1 CreditTM must be developed and presented in compliance with all ACCME accreditation requirements - in addition to all the requirements of the AMA PRA program.

All activities so designated for, or awarded, credit will be subject to review by the ACCME accreditation process as verification of fulfillment of the ACCME accreditation requirements.
Content Validity of Enduring Materials

- Providers that produce enduring materials must review each enduring material at least once every three years or more frequently if indicated by new scientific developments.

- While providers can review and re-release an enduring material every three years (or more frequently), the enduring material cannot be offered as an accredited activity for more than three years without some review on the part of the provider to ensure that the content is still up-to-date and accurate.

- That review date must be included on the enduring material, along with the original release date and a termination date.
THANK YOU!
